**Thursday, December 11, 2025  
11-12 AM CEST**

**<https://horiba.link/1112-25>**

This online session will explore a coordinated, interprofessional approach to safe and effective heparin management, addressing the limitations and variability of current monitoring methods such as aPTT and anti-Xa assays.

### Who should attend?

Healthcare professionals and laboratory personnel involved in prescribing, administering, managing, or monitoring patients receiving heparin—particularly those working in critical care, cardiology, hematology, and emergency medicine.
