Sulfur-in-Oil
SLFA-60/6000 Series
X-ray Fluorescence Sulfur-in-Oil Analyzer
SLFA-60/6000 series for a new generation of petroleum products

HORIBA introduces the new standard of sulfur-in-oil analyzers, the SLFA-60 and 6000 series. These instruments feature new software and hardware to meet the growing challenges in the petroleum industry.

Compact & Robust Design

Secondary Window to Prevent Leakage

Both the SLFA-60 and 6000 series have a protective membrane covering the cell window to prevent the detector and X-ray tube from accidental sample leakage. This protective membrane unit is simple to assemble and replace.

Wide Sample Range

Large Screen Display

The easy viewing monitor screen will display real-time data in ppm or %.

Simple Operation

Turntable (SLFA-6800 only)

The turntable equipped with the SLFA-6800 has been newly devised. Newly designed stepper motor is more robust and faster between sampling.

Safety Features

HORIBA introduces the new standard of sulfur-in-oil analyzers, the SLFA-60 and 6000 series. These instruments feature new software and hardware to meet the growing challenges in the petroleum industry.

Large Screen Display

Wide Data Printout

USB Interface

Key Switch

SLFA-60

SLFA-6100/6800
**Simple Operation**

**Measurement Procedure**

1. Pour the sample into the sample cell
2. Place the sample cell on the sample holder
3. Set to the measurement condition
4. Press the “MEAS” button to start the measurement
5. Instrument displays the results and data output

**Output Options**

Print out, USB memory stick and USB cables connected to PC are available as output options.

* Printer can be switched off if not used.

**i) Wide Data Printouts**

The users can control the contents/volume of the information on the printouts. There are 3 layout options. Printouts show sample ID, X-ray spectrum, date/time, measurement average value, standard deviation and calibration curve graph etc., on 80 mm wide format for easy viewing.

**ii) USB Output**

The user can transfer data into USB memory or PC connected with USB cable.

**Safety Features**

In addition to our thorough X-ray leakage tests at the factory, the SLFA series are equipped with these safety functions:

**Key Switch**

Only when the key switch is in the "ON" position, X-rays are turned on.

**Shield Shutter**

Even if the lid is open, X-rays are continuously on. However, the shield shutter covers the X-ray and will prevent leakage that might be emitted.

**Wide Sample Range**

**Expanded Measurement Range (0 - 9.9999 wt%)**

The SLFA-60 has expanded its range compared to the conventional model, and now both the SLFA-60 and 6000 series can measure from 0 - 9.9999%.
