

# Sulfur-in-Oil

**SLFA-60/6000 Series** 

X-ray Fluorescence Sulfur-in-Oil Analyzer

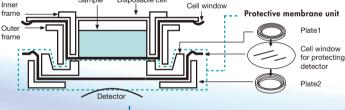

## Compact & Robust Design

#### Secondary Window to Prevent Leakage

Both the SLFA-60 and 6000 series have a protective membrane covering the cell window to prevent the detector and X-ray tube from accidental sample leakage. This protective membrane unit is simple to assemble and replace.

#### Cross section of sample cell and detector

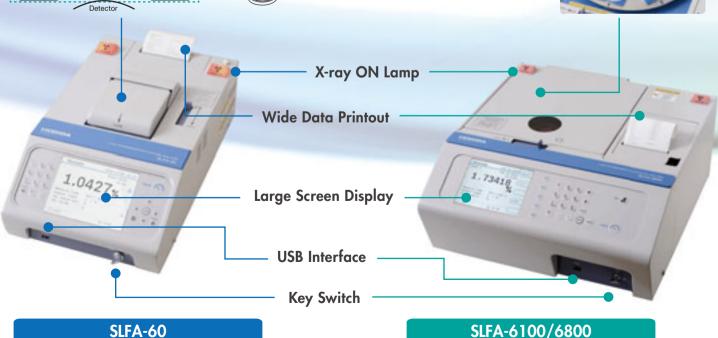

#### Large Screen Display

The easy viewing monitor screen will display real-time data in ppm or %.

### Turntable (SLFA-6800 only)

The turntable equipped with the SLFA-6800 has been newly devised. Newly designed stepper motor is more robust and faster between sampling.

## **Simple Operation**

#### Measurement Procedure

- 1. Pour the sample into the sample cell
- 2. Place the sample cell on the sample holder
- 3. Set to the measurement condition
- 4. Press the "MEAS" button to start the measurement
- 5. Instrument displays the results and data output

#### Calibration

New software allows the SLFA-60 to store 3 sets of calibration and the SLFA-6000 series 5 sets. It also allows the users to choose between linear or quadratic curves.

Calibration curves are restored manually without having to recalibrate as long as the users save the coefficients value/calibration data.

#### **Output Options**

Print out, USB memory stick and USB cables connected to PC

are available as output options.

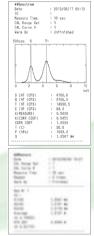

\* Printer can be switched off if not used.

The users can control the

#### i) Wide Data Printouts

contents/volume of the information on the printouts. There are 3 layout options. Printouts show sample ID, X-ray spectrum, date/time, measurement average value, standard deviation and calibration curve graph etc.,

on 80 mm wide format for

#### ii) USB Output

easy viewing.

The user can transfer data into USB memory or PC connected with USB cable.

## **Safety Features**

In addition to our thorough X-ray leakage tests at the factory, the SLFA series are equipped with these safety functions:

#### Key Switch

Only when the key switch is in the "ON" position, X-rays are turned on.

#### Shield Shutter

Even if the lid is open, X-rays are continuously on. However, the shield shutter covers the X-ray and will prevent leakage that might be emitted.

The shield shutter

## Wide Sample Range

Expanded Measurement Range (0 - 9.9999 wt%)

The SLFA-60 has expanded its range compared to the conventional model, and now both the SLFA-60 and 6000 series can measure from 0 - 9.9999%.

## **Technical Specifications**

		SLFA-60	SLFA-6100	SLFA-6800	
ľ	Measurement principle	X-ray Fluorescence Analysis Method			
Ī	Measurement samples	Sulfur in petroleum products such as heavy oil, naphtha, crude oil and light oil			
Ī	Measurement range	0 - 9.9999%			
Ī	Repeatability	15 ppm or less with a 1% sulfur sample 5 ppm or less with a 1% sulfur sample, 1.6 ppm or less with a 0% sulfur sample			
Ī	C/H error correction	+/- 50 ppm or less per C/H *with a 1% sulfur sample			
	Lower detection limit	20 ppm or less * 5 ppm or less *			
	Number of calibration curves	Up to 15 calibration curves			
	Calibration curve order	Linear or Quadratic (both automatic selection and manual settings are available)			
	Amount and number of samples	4 - 10 mL, 1 sample 4 - 10 mL, 8 samples			
	Measurement time	10 - 600 sec			
	Data output	Printout, USB memory stick, USB cable connected to PC			
	Spectrum measurement	Energy Range: 0 - 10 keV, spectrum analysis to verify instrument performances			
	Operating temperature	+ 5 °C to + 40 °C (+ 41 °F to 104 °F)			
	Operating humidity	80% max relative humidity in temperature range + 5 °C to + 30 °C (+ 41 °F to 86 °F) Linear decrease to 50% relative humidity in temperature range + 31 °C to + 40 °C (+ 88 °F to 104 °F)			
Ì	Power supply	AC 100 - 240 V +/- 10%, 50/60 Hz			
Ī	Power consumption	80 VA	150	) VA	
	Conformity standard	ASTM D4294 (USA), ISO 8754, JIS K2541/B7995			
	Weight	Approx. 9 kg	Approx. 21 kg	Approx. 23 kg	
	Dimensional Outlines (Unit: mm)	400	468	468	
		1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	200	403	

<sup>\* 3</sup> times the standard deviation with a 0% sample

The HORIBA Group adopts IMS (Integrated Management System) which integrates Quality Management System ISO9001, Environmental Management System ISO14001, and Occupational Health and Safety Management System OHSAS18001. We have now integrated Business Continuity Management System ISO22301 in order to provide our products and services in a stable manner, even in emergencies
