

Nanosecond and picosecond pulses from UV to near-IR

NanoLED Pulsed sources

The NanoLED series of pulsed light sources incorporate both LEDs and laser diodes, producing nanosecond and picosecond pulses from the UV to NIR. These sources are ideal for TCSPC applications. Ideal for OEM applications and for use with our full range of HORIBA Scientific fluorescence lifetime systems:

TemPro FluoroCube Fluorolog® TCSPC FluoroMax® TCSPC DeltaFlex DeltaPro DeltaTime

Feature

Spectroscopy Benefits

Plug-and-play operation

Easily change wavelengths throughout entire range of NanoLEDs

Picosecond laser-diodes and nanosecond LEDs

Determination of short lifetimes

Proven reliability

Repeatable and secure experiments

Wavelengths from 250 nm to 1310 nm

Study the broadest range of samples

Ultra-compact design with built-in optics

Small footprint and no changing lenses

Gold-plated casings

Minimized electromagnetic emissions

Selectable output for synchronization

NIM and TTL compatible

“Sync delay” control

Quick adjustment of sync output relative to optical pulse (up to 200 ns)

Stand-alone controller with USB control and dedicated software

OEM applications

Notes:

1. Pulse width refers to optical pulse duration; in TCSPC the prompt FWHM is also a function of detector TTS
2. The values given are for guidance only; the exact characteristics are dependent on the individual diode
3. Heads require heat sinking by connection to spectrometer (standard on HORIBA Scientific systems)

Controller

Function	Typical power	Note:
Repetition rates	10 kHz, 25 kHz, 50 kHz, 100 kHz, 250 kHz, 500 kHz, 1 MHz	
Sync outputs	Selectable format: NIM-compatible ($-0.8 \text{ V}_{\text{pp}}$, 50Ω) or TTL-compatible ($+2 \text{ V}$, 50Ω)	
Sync delay	0–200 ns	
User interface	Keyswitch control of emission, operating parameters edited using supplied software and stored in non-volatile memory	
PC interface	USB 2.0, 32-bit and 64-bit drivers are provided and the control panel software operates on all version of Windows® from XP onward	
Power requirement	110 V to 240 V AC, 50/60 Hz, 100 VA	
Operating temperature	$+5^\circ\text{C}$ to $+30^\circ\text{C}$	
Weight & dimensions	1 kg; 210 mm × 134 mm × 75 mm
