

## Example: 6 channels

## Product specifications

|                           |   |                       |   |
|---------------------------|---|-----------------------|---|
| Channels                  | 2-15 Channels 5-50°C (recommended range: 15-45°C) | Operating temperature | 5-50°C (recommended range: 15-45°C)                   |
| Introducing flow rate     | Depends on channels and introducing flow rate     | Proof pressure        | 1000 kpa (G)  |
| Ratio setting range       | Depends on channels and introducing flow rate     | Mounting orientation  | Free  |
| Supply pressure condition | Depends on channels and introducing flow rate     | Control interface     | RS-485, DeviceNet™                                    |
| Valve type                | O: Normally open C: Normally close                | Power supply          | Master, Slave DC24V<br>(Conforming to ODVA standards) |
| Response *1               | Depends on channels and introducing flow rate     |                       |   |

\*1 The response time of each channel is calculated with the response time being the time when the flow rate output of this product reaches 98% of the flow rate setting change amount. The slowest response time is the response time of the flow splitter.

## Selecting a model

**IMS**

The HORIBA Group adopts IMS (Integrated Management System) which integrates Quality Management System ISO9001, Environmental Management System ISO14001, and Occupational Health and Safety Management System ISO45001. We have now integrated Business Continuity Management System ISO22301 in order to provide our products and services in a stable manner, even in emergencies.

Applying to the EU RoHS Directive : This products is compliant with the restriction of the designated 6 hazardous substances(\*).  
 (\*) lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE)

Using lead-free soldering : Lead-free soldering is used for mounting components of printed circuit boards.

- Many countries consider the reinforcement of regulations concerning the risk caused by lead to human body and the environment
